The examiner hereby requires that applicant submit the following information as set forth under 37 CFR 1.105:

Identification of whether a search of the prior art was made, and if so, what was searched. This includes, but is not limited to, any commercial databases or websites (URLs) known by the inventor or his representatives that could have been or were searched for information that relates to molecular statistical analyses (given the breath of the claims) and data systems that generate data upon statistical analyses of groups of descriptor vectors that characterize molecular regions (as they are clearly the preferred embodiment).

A copy of any non-patent literature, published application, or patent (U.S. or foreign), by any of the inventors, that relates to molecular statistical analyses (given the breath of the claims) and data systems that generate data upon statistical analyses of groups of descriptor vectors that characterize molecular regions (as they are clearly the preferred embodiment).

A copy of any non-patent literature, published application, or patent (U.S. or foreign) that was used to draft the application, or listed within the specification on various pages.

Where the claimed invention, is an improvement, identification of what is being improved as disclosed in the specification on page 3, "the independence of the particular property field used, and a context dependent scaling procedure" in lines 3-4.

This information is reasonably necessary to properly examine the claimed subject matter. Applicants are given a TIME PERIOD of **TWO (2) MONTHS or SIXTY (60) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.
